

Getting a fuzzy or freezing picture?

If you've lost the signal on your television, or you're experiencing poor picture quality, pixelating or freezing TV channels, Tower Aerials can carry out a TV Aerial or Satellite TV repair at your property and get all your TV channels working again!

A Tower Aerials engineer can attend your property & perform a FULL diagnosis of your television system. Once the fault has been found, we will endeavour to rectify your television viewing system to receiving the optimum signal possible.

Our fully equipped mobile vehicles have every tool & equipment needed to get your aerial or satellite system working again. Should you require additional equipment, such as a signal booster or an upgrade to your existing system to improve reception levels, don't worry – we can get all that completed during the same visit!

Why use Tower Aerials?

- We're Local – we only work around the Bury area – so we have a second-to-none an in-depth knowledge of the area
- We're Experienced – we've been doing this job now since 1974
- We're Fully Insured – we have full public liability insurance & provide 2-year guarantees for all work carried out
- We've got the Best Equipment – we only stock quality materials & tools to ensure we give you the very best installation and service

Tower Aerials are local to Bury. And because we are local, we are on-hand to provide a broad range of digital television services usually within hours of your telephone call, & more importantly, have in depth knowledge of the Bury area & the signals being received for services such as Freeview, Freesat, Sky and a range of satellite systems.
