

At Oven Wizards we don't just clean ovens, hobs, microwaves and extractors, we valet them and try our very very best to restore them to as near to new as we physically can.

Whilst we are on site it costs very little to add your hob, extractor and microwave, so what we already consider to be money well spent, it becomes good value too.

We operate from a fully adapted, liveried van. We strip your oven down and immerse all removable parts in our heated dip tank.

We use environmentally friendly products during your oven renovation process, so your oven is ready to use the moment we leave, although you may just want to stand and be dazzled by the sparkle for a little while!

The whole process can take anything from one and a half hours to three hours depending on the size of your oven but rest assured no corners will be cut if your oven hob extractor or microwave needs more attention.

At Oven Wizards we are happy to do just one clean, but we would prefer your first oven clean to be the start of a long term relationship and we will discuss with you a programme to maintain your appliances in tip top condition.

Please feel free to contact me, Jonathan Gains, to discuss anything regarding your individual oven, hob, extractor and microwave needs and everything I do as an Oven Wizard.
